So, I am a little dwarf or something? Must be, when I am holding the forever burning match, sounds legit... Having the ground almost on my chin. You can however jump very high and even double jump to get to higher spots to get the items.

Find candy to heal yourself, 3 ropes, a light and a hook. Sounds simple enough. Goal is to escape the house of the three giants.

There is a guy in a room, watching something funny, looks like Warframe? xD When he see me, he stops laughing and just staring at me. When I touch him, I die. Okay, so don't approach the NOT laughing guy. He isn't into that kind of stuff. The other giants? I heard them, but...

So I got some of the items and found a stairway. When I tried to get up the stairway, it said that it was too dark. So I found the forever burning match and came back to the stairway. The stairway didn't say a word. But still, I could not get up the stairs.

After trying numerous actions and tries, I got bored, found the game as "Broken" and de-installed the game. So my verdict: Don't buy it... It landed in my category: "Trash"

Another thing that definately sucks A S S is the music. It's so frickin' loud, I could not hear what the other giant was saying. And there are no options for it in the menu either. Options in the menu doesn't make sense to me either, not from this world, for sure. Same for the choice of music... WTF?

This game could be unfinished, true. The description makes the game interesting to try out. But if this is it, it's not tested well or should be more explanatory. Eitherway, at this state, no fun at all to play. Maybe set this game as: EARLY ACCESS. Like I expect more from a finished game. With the extra notation of EARLY ACCESS, it's all forgivable.

That is, if the Developer is till working on it or patching it or whatever... But seeing there wasn't a patch or whatever EVER since it got released on Steam, I can assume there won't be one since this game came out in January 2018.... It's not good.
